NGUYEN DINH CUONG
Web programmer

As we know the job is not khan, as bored as people think it is a miniature that you can satisfy discovery. Wherever you need to work, you have to work hard and make time for it, take care of it like a child. But with the information, information and programming jobs will be used to be better. Why so? Simple but because of a job is a simple job, apply to high if you have a look of the signature, say and say you can not work to work.

WHAT AM I DOING

DESIGN TEMPLATE JOOMLA TEMPLATE

Joomla is my special strength, I can customize and build templates joomla easily.

BUILD MODULE, COMPONENT JOOMLA

With more than 7 years of experience in rescuing and learning the joomla system including reading the library code and customizing it helped me partly understand the structure of a large system.
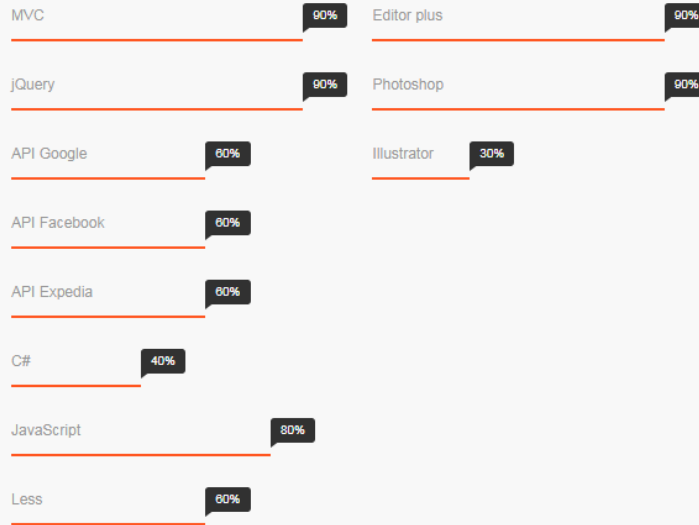

WRITING PLUGIN JQUERY

Jquery is great, especially with the server language we can build for our customers. The frontend is really friendly and easy.

WRITE ANDROID APPLICATION

With the age of mobile technology, using java to write Android applications for the user is a must for a programmer like me.

WRITING APPLICATION WINDOWS

As we all know the profession is not dry, boring as people think it is a miniature that you can satisfy discovery. Wherever you need to work, you have to work hard and make time for it, take care of it like a child. But with the information, information and programming jobs will be used to be better. Why so? Simple but because of a job is a simple job, apply to high if you have a look of the signature, say and say you can not work to work.

EQUIPPED WITH SOME SOFT SKILLS

In addition to the knowledge to serve the job, the soft skills, such as communication, presentation ... I also often compensate for myself
